

SUBCOMPACT UTILITY LIFT P/N 900050

1632-1/2 West 134th Street, Gardena, California 90249
(310) 808-0001 Fax (310) 808-9092 www.inca-tvlifts.com

The Subcompact Utility lift, P/N 900050, is a precise, rack and pinion motorized lift that will raise loads up to 50 lbs. in weight. The small size platform, only 12.875" wide x 8" deep x 2" thick, is ideal to lift small items such as speakers or digital cameras. The standard size of 14.6" wide x 14" height provides a 12" travel. This unit is available in custom sizes where the platform can be larger and the side panels can be taller or shorter, but the maximum lifting capacity of 50 lbs. remains the same. The platform cannot be less than 12.875" wide x 8" deep x 2" thick.

An external cable connects the lift to a remotely mountable j-box, to which all standard Inca controllers can be attached, such as 12 vdc, dry contact, and radio remote controls.

ITEM NUMBER	WIDTH	DEPTH	HEIGHT	TRAVEL HEIGHT	CAPACITY
900050-SC	14.6"	7.625"	14.0"	12.0"	50 lbs.
900050-400-SC	Varies	7.625"	Varies	Varies	50 lbs.
