

**UTILITY LIFT
P/N 900070-SC**

1632-1/2 West 134th Street, Gardena, California 90249
(310) 808-0001 Fax (310) 808-9092 www.inca-tvlifts.com

The Utility lift is unique small footprint unit designed to move kitchen appliances, coffee machines, spices, and or hidden bars. This unit can be configured to support from 100 lbs. to 450 lbs. payload. Because of the small size of the lifting platform, all functions normally found on the lift have been exported to an external junction box. The unit runs off 110 power and draws roughly three amps. External limit switches are easy to set and are reliable. Custom sizes or versions of this machine are ready available..
