The Inca Flat screen TV Pullout and Tilt Mechanism, 900500-PT1 can be used to bring a Flat screen out of an enclave, wall, above a fireplace or any other concealment and tilt it outwards, all on remote control. This mechanism is constructed of sturdy 1/8" steel plate, finished in semi-gloss black epoxy. The positive, direct motor is smooth and silent. The Universal Junction box (UJBX) interface permits the ready connection of all controllers including RF, infrared, touch-screen, dry contact and 12 VDC external commands. The 25' cable permits the location of the controllers at a convenient access point. Internal rolling cable trays are provided for audio/video/power cable management. The standard design can extend a 150 lb. flat screen 12" outwards and then tilt it down to an angle of 30°.

The Pullout and Tilt Mechanism consists of two components:

ITEM NUMBER	DESCRIPTION	OVERALL WIDTH	OVERALL DEPTH	OVERALL THICKNESS	EXTENSION
900500-P1	The Pullout Mechanism	45.00"	12.50"	3.00"	12.00"

ITEM NUMBER	DESCRIPTION	OVERALL WIDTH	OVERALL DEPTH	OVERALL THICKNESS	TILT
900500-T1	The Tilt Mechanism	45.00"	6.00"	31.75"	30°
