

FLATSCREEN TV PEDESTAL LIFT P/N 900700-A

1632 1/2 West 134th Street, Gardena, California 90249
(310) 808-0001 Fax (310) 808-9092 www.inca-tvlifts.com

The Inca line of pedestal type lifts can move flat-screen TVs and displays (70 lbs capacity), in near complete silence (DB under 45), from a concealed position to a desired viewing height. This unique design is able to support and function in a more simple and cost effective manner than most lift mechanisms on the market today, while providing a very quiet and solid unit that can be enjoyed for years to come. Works with hinged lid a flat top cabinet design.

Able to accommodate up to most 65" flat-screen displays, these units have an overall depth of 4.0" inches, making it possible to conceal displays in a minimal amount of space. And because the unit itself is only 13.250 inches wide, there is plenty of space left in the installation space for cable management, ventilation, etc. The overall height of the unit varies, depending on the size of the TV and the desired amount of vertical travel. Lower and upper limit switches on the unit's track allow for fine tuning of the TV's concealed position and raised position.

Installation is quick and easy since the lift mechanism is shipped completely assembled and weighs as little as 40 pounds. Simply fasten the track to a mounting surface of your choice, make all appropriate connections with the junction box and controller, and lastly, mount your TV either directly to the VESA mounting plate attached to the moving truck or an Inca mounting system can be incorporated to the unit for quick and easy removal of the TV from the unit. The lift system is powder coated black, and runs off 120 power, at 25 volts.

The pedestal lift connects to the included external junction box (J-Box) via a coil cord. The external J-Box includes a fuse and power cable with plug and connects to a controller of your choice: a radio remote, a power sensor module, or a 12VDC dry contact trigger. It is engineered, designed, and manufactured in the USA.
